Education

The University of Chicago: Master's in Public Policy *(Data Analytics, Geospatial Specializations)* **2023-2025**
Harris School of Public Policy

The University of Texas at Dallas: BA in Political Science **2018-2023**
Economic, Political, Policy Sciences

Relevant Professional Experience

Consulting Services Intern, Econ & Geospatial **AECOM Advisory** **June 2025-January 2026**
Chicago, IL

- Conducted a parcel-level susceptibility-to-change analysis in ArcGIS and R to evaluate redevelopment potential based on building age, lot coverage, land value, and ownership characteristics.
- Supported transit-oriented development planning by building a network dataset of Rockford bus stops and routes in ArcGIS and using Network Analyst to generate 15-minute walksheds around the proposed Metra station.
- Collaborated with in-house geology team to develop a live, interactive ArcGIS Online web map that translated complex geospatial and engineering data into client-ready visuals for CSU stakeholders.
- Built GIS workflows in ArcGIS Pro and ArcPy to convert disorganized campus CAD drawings into a standardized geodatabase, resolving projection and scaling issues for geothermal feasibility mapping.
- Queried ACS and Lightcast APIs using SQL to extract demographic and socioeconomic data for existing conditions analyses across multiple project geographies including Rockford, IL and Prince George's County, MD.
- Adhered to team GIS data governance standards for file naming, layer organization, and workflow documentation; annotated exploratory analytical decisions to maintain transparency when drawing interpretive conclusions from ambiguous data.

Analytics & Business Development Intern **Center for Economics Research in Pakistan (CERP)** **July 2024-September 2024**
Lahore, Pakistan

- Analyzed 4 Pakistani national datasets using R, Python, and GIS, for promotion of financial inclusion and female entrepreneurship under the *CIRCLE Digital Literacy Program*.
- Cleaned CERP's post-intervention impact assessment datasets using Python and R, resulting in process improvements for the entry and collection of real-time education engagement data.
- Presented analysis of program data with R, and GIS, resulting in the implementation of improvements in education data collection, and tiered training programs for urban and rural women.

Lead Research Assistant **University of Chicago** **February 2024-November 2024**
Chicago, IL

- Managed database creation on freighter activity by incorporating data extracted from port acquisition records and GPS tracking data of vessels, used for quantitatively modeling forecasts of economic and trade impacts of Chinese sanctions on acquired ports.
- Estimated feasibility of Monte Carlo simulation and Network Analysis for quantifying trade volume losses from sanctioning.
- Produced detailed visual data reports and presentations to strategize research design for academic peers and stakeholders.

Technical Skills

Languages: English (U.S.) - native speaker, Urdu & Hindi (Pakistan) – fluent
Programming: R (Advanced), Python (Advanced), ArcPy (Functional), Ruby (Intermediate), SQL (Functional)
Technologies: ArcGIS, QGIS, Leaflet, R Shiny, ESRI, ACS, CoStar, Lightcast/EMSI, Placer, Tableau, PowerBI, GitHub, Excel, G-Suite, Workday, Office365, Google Cloud Platform, OpenStreetMap

Awards and Recognition

- National Council on International Trade and Development (NCITD) Merit Scholarship recipient.
- Harris Student Organization of the Year Accolade 2024 Recipient, for work within the Asian Policy Forum

Organizations and Leadership

Vice President, Asian Policy Forum (APF) **University of Chicago** **September 2023-Present**

- Led a 14-person team to organize events, career fairs, and speaker panels with Asian diplomats and industry professionals.
- Raised $25,000 through vendor partnerships and sponsorships, and $13,000 for the 2025 ISCNE South China Sea exercise.
